

Skyscape Painting

Create a day or evening skyscape with either the sun or moon and clouds using curvilinear lines and blending. A skyscape is a picture that includes an extensive view of the sky. Curvilinear lines are lines that are curved and flowing. Use a pencil to draw the lines and a circle for the sun or moon.

Step 1: Draw sun or moon

Step 2: Create curvilinear clouds.

Step 3: Using acrylic start by painting the first warm color (yellow) on the top side of the clouds.

Step 4: Pick a darker warm color (red or orange) to paint the underside of the clouds.

Step 5: Pick a cool color (like blue, green, or purple) to fill in the sky.

Step 6: Use darker and lighter colors to create highlights and shadows.
