

Fuzzy Caterpillar Activity Template

Do you want to make your own fuzzy caterpillar? To make your caterpillar, use the following template to construct four pom poms. You will need paperboard, orange and brown/black yarn, scissors, thread, and a needle.

Instructions: Cut out the c-shaped templates and trace them onto recycled paperboard (like an old cereal box). Stacking the two templates on top of one another, wrap your yarn around the templates till it is full and consistent. Cut the yarn in between the thin space between the templates, while holding the small yarn pieces together. Then, cut a separate piece of yarn. Tie it around the midsection of all your small cut yarn pieces, using the template as the guide. Create two brown and two orange pom poms. Connect the four pom poms (two orange in the middle, brown at the front and end) by tying the loose yarn pieces from the knot at the midsection of each pom together one by one. Flip over the poms and connect them on the opposite side by looping pieces of thread or yarn through the midsections and tying them together. Your caterpillar is complete!
