

# How to Create a 3-D Paper Vase of Flowers

**Materials:** 2 sheets of colored construction paper or white printer paper, colored pencils and markers.

**Step 1** Fold a sheet of white paper in half lengthwise.

**Step 2** Draw half a vase on one side of the fold.

**Step 3** Cut through the line at the top and bottom of vase. Push the vase out in the opposite direction to create a pop-up effect.

**Step 4** On a separate piece of paper, draw flowers with stems, using reference material to actual flowers or representing the month you were born.

**Step 5** Color in and add detail to the flowers with colored pencils.
