

The Counting Hippos

It's lunch time for the Counting Hippos! Hippos love to eat the leaves of a plant called the "hyacinth". Color and cut out the ten hyacinth leaves, and then give the parent hippo and the baby hippo leaves to eat. Which hippo has more leaves? Cut out the "equal", "greater than", and "less than" signs to explain which hippo has more.

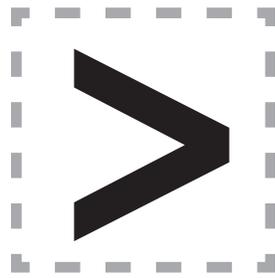

Place your equal, greater than, or less than signs here to show which hippo has more, less, or an equal amount of leaves!

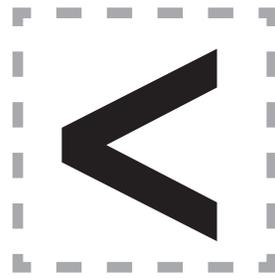

hyacinth leaves

equal

greater than

less than

Fun Hippo Fact: They live in water and are herbivores (which means they eat grass)!
