

# Coffee Filter Dolphin Craft

Follow the instructions below to create your own coffee filter ocean backdrop!

Materials: Washable markers, spray bottle, paper, scissors, glue, and coffee filter.

1. Start by coloring your coffee filter. The colors will bleed together later, so you can use crazy scribbles!

2. Spray your coffee filter with water and scrunch together to create a watercolor effect. If you don't have washable markers, use gloves for this step.

3. Color and cut the dolphins below and add to your underwater scene! You can draw more ocean creatures to create an ecosystem!
