

Paper Nurse Scrubs

- 1: Fold either side inward to meet in the middle.
2. Cut along the center of the paper in between the folds. Cut to halfway down the height of the paper.
3. Take the top of one side and fold behind at an angle to form the sleeve. Repeat with the other side.
4. Cut triangles from either side of the shirt. Then, fold back to create a collar.

To make a pipe cleaner stethoscope, first curl the ends of one pipe cleaner. Cut a second in half and connect it to the center of the first, and curl the ends.

Then, add it to your shirt and decorate!
