

Create Your Stop-Motion Character

Head

Upper Arm

Lower Arm

Upper Leg

Lower Leg

1. Customize your character by giving them hair, and clothes.
2. Using scissors cut out your character along the lines, careful not to cut out your character's design or hair.
3. Take 9 short pieces of your thread, and tape them in between each of the character's parts, leaving a little bit of extra room, like joints.
4. Once you have taped your character's body together, you can start animating them with stop-motion on flat surfaces.
