

# Make a Car Activity

## Directions:

1. Create an outline of a car. This car can look however you like!  
Just make sure to include two sets of wheels, headlights, and windows.
2. Place the battery pack on the bottom of the vehicle between the two wheels.
3. Place the induction motor at the rear end of the car, just above the rear end wheels
4. Place the inverter in front of the induction motor and connect the two with lines
5. Finally, color the car with any color you like!
