

COUGAR

The Cougar's name comes from a combination of two indigenous names and was originally called a 'Cugar,' which today we know as 'Cougar.' Cougars eat animals like Coyotes, Porcupines, and Racoons, and Deer and they can weigh up to 136 pounds!

Directions:

1. Fold paper in half like a book and cut along the outline.
2. Draw the fur and other details like eyes, nose, and whiskers.
3. Color Orange and fold along the dotted lines to close its mouth.
