

# Using LinkedIn to network...

## Step 1: Create your profile

- Include your education, work experience, skills and endorsements, as well as your accomplishments. Also make sure to follow accounts your interested in.
- Be sure to include a professional profile picture. Make sure it is bright and your face is visible.

Brainstorm here:

## Step 2: Create connections

- Find someone you are interested in connecting with. You can look through their profile and see their experience and background. Then click connect. It is helpful to send them a message as well. You want to explain why you are reaching out. Are you interested in their work? DO you have mutual connections, etc. Ask if they are willing to talk to you.
- Add people you already know! This will help you see more people, as well as put your profile out there for people to find as well. This will help you find more connections.

## Step 3: Include any other details you want other to know.

- An idea would be to include other socail media accounts

Brainstorm here:
