

HOW TO NETWORK

What is networking?

Networking is meeting other individuals who share common interests with you. This can be through work, clubs, school, etc.

Before continuing, can you think of different ways to network?

How to network

1. There are many different ways to network. The first way is social media. Social media plays a big role in most of our lives. Apps like LinkedIn can help you network. LinkedIn gives you the opportunity to set up your profile and connect with others.
2. Another way is to go to meet-ups or different social events (work parties, birthday parties, etc). Anywhere you can meet people and create a connection is an opportunity to network.

Why do I need to network?

Networking is important because you can learn a lot from other people. You can exchange information, advise, and share experiences. Networking can bring new opportunities to you, for example, getting a new job, or a new position. Networking is also an opportunity to help others. You could be the one to help someone get a job or a new position.

Can you list some examples of how you have already networked? How do you plan to network in the future?
