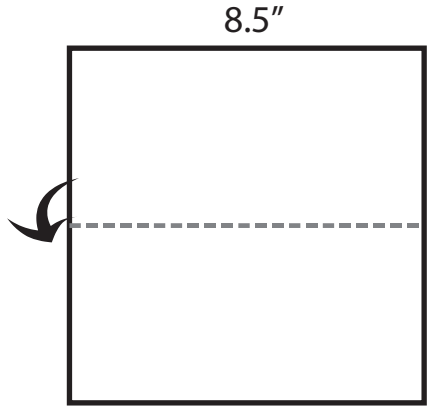
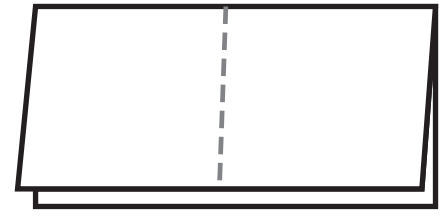
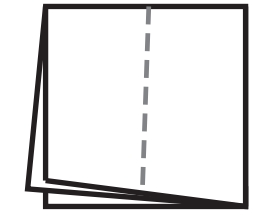
Origami House #2



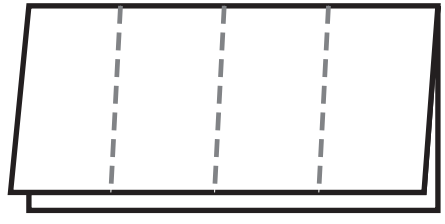
① Fold in half.



② Fold in half again.

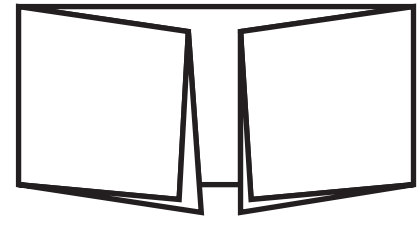


③ Fold in half once more.

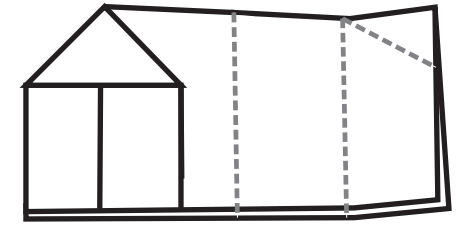


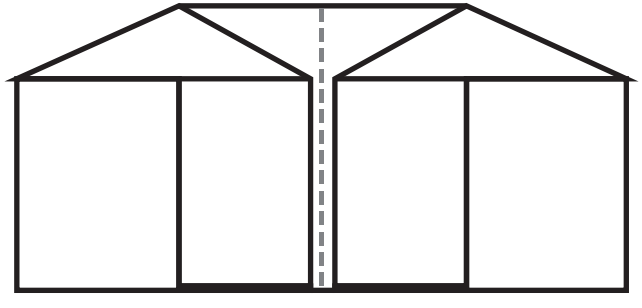
④ Unfold so you have 4 quaters created.

⑤ One at a time, fold each end up and press the corner down until it forms a triangle.This is the roof.

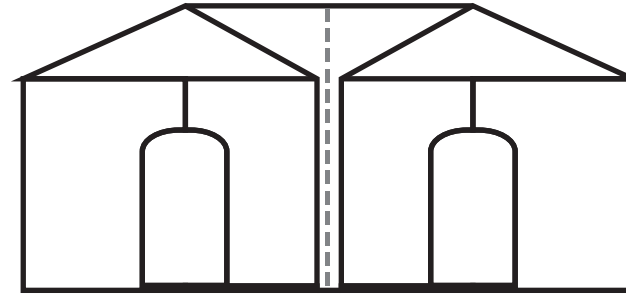


⑥ Do this to both ends.





⑦ You should have a folded house!



⑧ Now, add doors, window and arhitecture elements of your choice.

Design by Kristin Groenveld & Ugonna Valentine Muoghalu 2016
