

How To Make Candles

*Safety message: please complete this project with adult supervision

Materials

- Microwave
- Paper Cup (microwaveable)
- Wax (wax bead melts)
- Candle Liquid Dye
- Wick
- Container/Jar/Mason Jar
- Skewer/Popsicle Stick
- Essential Oil/Scent

Instructions

1. Pour wax 3/4 of the way into the paper cup.
2. Place in microwave and heat for 5 minutes. If not liquid, microwave at 30 second intervals until wax is liquid.
3. As wax is in microwave, put wick into your container
4. When heated fully, carefully take cup out of the microwave and add some of the dye and scents
5. Use a popsicle stick, and stir the wax to mix the scent and dye together
6. When stirred fully, carefully pour wax into the container.
7. Keep wick in the middle of the container by using the skewers/popsicle sticks to hold in place
8. Set candle for 24 hours before lighting

Congrats! You made your first candle!
