

# DIY Rain Sticks

## Materials

- empty paper towel roll
- tin foil
- rice or dried beans
- tape
- colored paper

## Directions

1. Start by taping up one end of the tube, and making sure it's sealed completely.
2. Slide a thin piece of tin foil in the tube, ideally the same length.
3. Partially fill the tube with some rice or dried beans, and tape the other side shut.
4. Use the colored paper to decorate your tube, and add fun designs!
5. You can now turn the tube around to hear the rice or dried beans against the tin foil.
